

THE CASCADE PIER AND AREA SAGA CONTINUES

SO WHAT IS THE AUSTRALIAN GOVERNMENT DOING NOW?

Apparently there are **safety improvements required** to be considered for Cascade Pier and the hardstand area behind it.

WHY is the Australian Government yet again spending more of the Australian tax payers money, and how much is this going to cost.

DOES the Australian tax payers know how much of their money has been wasted on Norfolk Island and especially on the Cascade Pier upgrade?

The Scope:

Look at installing a kerb about the tidal stair

Repair or replace the rough concrete slab surfaces in the line of travel of the forklifts.

Extend concrete hardstand eastward to open up more useable space behind the pier

Replace broken kerb that runs along the cliff

Improve sight lines by cutting off a section of the Dock Crane aluminium work platform

Norfolk Online New is told that all Norfolk Island Chamber of Commerce, Inc members have been informed of the scope being considered and Chamber welcomes the invitation to comment on this.
